Professional Summary

Building and shipping revenue-generating products across cloud, data, and developer platforms for over a quarter century; pragmatic, driven, hands-on.

Skilled at turning disconnected pieces (legacy systems, partner integrations, half-finished pipelines) into coherent, usable products. Product range spans owning roadmap and GTM directly as a Product Manager (MongoDB) to scoping and shipping integrations alongside ISV and AWS product managers as a Partner Solutions Architect (AWS).

15+ years hands-on database work (MUMPS/Caché, MongoDB) plus systems-level infrastructure through devops, cloud, and observability — with daily hands-on AI agent tooling experience (Claude Code, Kiro, MCP).

Employment History

Amazon Web Services

New York, NY

WW Senior Partner Solutions Architect — Observability, DevOps, GenAI

May 2022 – Present

- Enabling partner integrations, launches, and GTM across 7 top AWS ISVs (Datadog, Dynatrace, Grafana, MongoDB, New Relic, HashiCorp, Anthropic), collectively billions in ARR and hundreds of millions in AWS Marketplace/co-sell contracts.
- Shipped over 100 partner integrations and POCs, working directly with AWS service teams (Bedrock, Lambda, ECS) and partner product managers.
- Assisting with partner acquisitions (CloudCraft, acquired by Datadog; BindPlane and DevCycle with Dynatrace), helping the acquired teams ramp up on AWS and ISV partnership across both technical and business dimensions.
- Built the AWS AppConfig feature-flag extension for Dynatrace; hands-on daily with AI-agent interfaces (Kiro, MCP, ACP) and agent-eval tooling (LLM-as-judge scoring AI-SRE fixes).

MongoDB, Inc

New York, NY

Product Manager Cloud

Aug 2019 – Jan 2022

- Kubernetes PM: shipped the official Helm Chart repository, the MongoDB Atlas Kubernetes Operator, and Multi-Cluster support.
- Launched the MongoDB Atlas AWS CloudFormation Custom Resources and Quickstart; grew adoption from zero to 400+ clusters launched per month in 12 months.

Technical Director

Aug 2017 – Aug 2019

- Sole engineer and product owner for the MongoDB Atlas GCP Enterprise Marketplace integration.
- Product-managed MongoDB builds on IBM mainframe (s390x) platforms, enabling IBM to ship MongoDB support in Cloud Pak for Data.
- Product manager for the MongoDB Cloud Foundry Tile; built the Atlas Open Service Broker, migrating 400+ microservices to Atlas with zero application code changes.

Senior Consulting Engineer

Jan 2015 – Aug 2017

- Embedded with enterprise customers (United Airlines, The Gap, US Dept. of Veterans Affairs), worked on complex systems such as a MongoDB-backed CQRS warehouse-sorting system (The Gap) and a mobile/onboarding app (United).

Additional Experience (1998–2014)

Sales Engineer, InterSystems (hands-on Caché/MUMPS database work, HL7, Epic, FHIR/HIPAA) | Senior Software Engineer Lead, Microsoft (Amalga data-ingestion engine, partner SDK) | Director of Product Development, QuadraMed (17-person team; Affinity Tool platform, a MUMPS database interface) | Software Engineer, IDX Systems (MUMPS database scripts, HL7 interfaces).

Independent Product Work (Stealth / NDA)

Building an independent portfolio of healthcare data infrastructure and developer-tooling products (data connectivity, compliance, observability), outside my day job and pre-launch; happy to share specifics in person.

Technical Skills

GenAI & Agents	Amazon Bedrock, AgentCore, Anthropic Claude / Claude Code, Strands SDK, LangChain, MCP, ACP, RAG, LLM Observability
Databases (15+ yrs)	MongoDB Atlas, Caché/MUMPS, HL7/FHIR data models
Data & Observability	OpenTelemetry, Dynatrace, Datadog, Grafana, LLM Tracing, AWS AppConfig
Platforms & Tools	AWS, Vercel, Railway, Fly.io, Kubernetes, Kiro, kiro-cli, Docker, Terraform, Git
